Index of Subjects

Acid gels, effect of interactions of whey proteins and casein micelles, 555
Amino acids
free, in skim milk during growth of *Lactococcus lactis*, 101
L-glutamine, transport by lactating rat mammary tissue, 199
rumen-protected, effect on fatty acid composition of ewes' milk, 413
Aroma, of Grana Padano cheese, 317

Bacteriocin-producing enterococci, detection by dot-blot and colony hybridization, 143
Body score, of dairy cows (review), 155

Carbonic anhydrase, in goat mammary gland in involution and lactogenesis, 43
Casein(s)
camel milk, sequence analysis, 209
interaction with whey proteins in acid skim milk gels, 555
proportion in cows' milk protein, 375
α_{s1}-Casein
A and F, in goats' milk, proteolytic specificity of chymosin, 233
F, in cows' milk, characterization and genotyping, 223
factor in digest affecting lymphocyte cultures, 569
specific oligoclonal antibodies against, 515
β-Casein, immunomodulatory properties in sheep, 697
Cheese
effect of cow forage preservation and breed, 9
Emmental, peptidases in juice, 119
Feta from ultrafiltered milk, effect of cheesemaking procedure on texture, 653, 665
goats' raw lactic, growth and enterotoxin production by *Staphylococcus aureus*, 273
Grana Padano, aroma, 317
Hispanico, effect of *Micrococcus* sp. INIA 528 cysteine proteinase on ripening, 621
Mozzarella
effect of genetic variants in bovine milk, 307
effect of herbage allowance of cows on ripening, 23
starter cultures, proteolytic activity, 109
Pecorino Umbro, accelerated ripening, 631
plasmin and plasminogen content by ELISA, 643
Saint-Nectaire-type, influence of lactation stage on quality, 295
Swiss, autolysis of *Lactobacillis helveticus* and *Propionibacterium freudenreichii*, 609
Chymosin, proteolytic specificity on caprine α_{s1}-caseins A and F, 233
Coagulase-negative staphylococci, in milk and environment of sheep, 139
Cysteine proteinase, from *Micrococcus* sp., effect on ripening of Hispanico cheese, 621

Dairy cows
body score (review), 155
effect of breed on milk coagulation and cheese, 9
effect of herbage allowance on Mozzarella cheese, 23
effect of ion supplementation in warm weather, 529
effect of white clover in diet, 389
growth hormone and glucose uptake, 423
postmilking standing time and feed availability, 681
pressure in teat cistern during suckling, 685
seasonal changes in milk, 401
sole disorders in organic herds, 175
Dairy products, measurement of sugar content, 675

Emulsion, oil-in-water, stabilization by milk fat globule membrane fraction, 465

Fatty acids in milk
effect of supplementary rumen-protected amino acids in diet, 413
free, in milk, effect of milking machine systems, 335
Forage conservation, effect on milk coagulation and cheese, 9

Gastric inhibitory polypeptide, in lactating goats, 433
Glucagon-like peptide-1(7–36)amide, in lactating goats, 433
Glucose uptake, insulin-independent, effect of growth hormone, 423
Growth factors, in bovine milk, relationship with growth factors, 93
Growth hormone, effect on insulin-independent glucose uptake, 423

Homocitrulline, formation during heating of milk, 579

Immunoglobulins, production in lymphocyte cultures, 569
Immunomodulatory properties, of lactoferrin, lactoperoxidase and β-casein in sheep, 697
Isoflavonoids, content in Australian cows' milk, 479

Kefir, characteristics with different grain : milk ratios, 149

Lactobacillus helveticus, and autolysis in Swiss cheeses, 609
Lactococcus lactis
accumulation of non-protein N during growth, and value for dairy isolates, 491
growth in skim milk, 101
in Mozzarella starter cultures, 109
Lactoferrin
bovine, immune response in mice, 283
immunomodulatory properties in sheep, 697

Lactic acid bacteria, lactococcal and leuconostoc isolates, value of non-protein N from *Lactococcus lactis* for growth, 491
β-Lactoglobulin, C-terminally truncated forms in Romagnola cows' milk, 243
Lactoperoxidase, immunomodulatory properties in sheep, 697
Lymphocyte cultures, proliferation and immunoglobulin production, 569

Mammary gland, goat, localization of carbonic anhydrase in involution and lactogenesis, 43
Mammary tissue, lactating rat, L-glutamine transport, 199
Mastitis, subclinical
assessed by milk yield and electrical resistance, 31
changes in electrical conductivity and somatic cell count, 187
***Micrococcus* sp. INIA 528**, cysteine proteinase, effect of ripening of Hispanico cheese, 621
Microfiltration, of milk, effect on protein size and charge, 443
Milk
bovine, Australian, isoflavonoid content, 479
effect of genetic variants on Mozzarella cheesemaking properties, 307
effect of lactation stage on cheesemaking properties, 295
effect of milking frequency, 365
free fatty acid content, effect of milking machine systems, 335
growth factors and somatic cell counts, 93
homocitrulline formation during heating, 579
microfiltration, 443
proportion of casein, 375
seasonal and lactational changes, 401
bovine, caprine, ovine, pressurizing and mineral distribution, 69
buffalo, distribution of plasminogen activator forms, 521
camel, casein sequence analysis, 209
ovine, effect on fatty acids of rumen-protected amino acids, 413
isolation of coagulase-negative staphylococci, 139
mineral balance on heating and storage, 457
porcine, contents of citrate, calcium, phosphate and magnesium, 55
Milk accumulation, in citernal and alveolar compartments, 1
Milk coagulation, effect of forage and cow breed, 9
Milk composition
effect of white clover in the diet, 389
seasonal and lactational changes, 401
with decreased milking frequency, 365
Milk fat globule membrane, stabilization of oil-in-water emulsion by fraction, 465
Milk formulas and cereals, sterol formation during manufacture, 591
Milk gels, *see* **Acid gels**
Milk protein yield, association with polymorphisms at the ornithine decarboxylase locus, 341
Milk yield, of dairy cows
and subclinical mastitis, 31
effect of white clover in the diet, 389
reduction during once daily milking, 1
with different liners, 353
with increased ion supplementation, 529
Milking machines
effect on free fatty acids in milk, 335
with different liners: effect on udder health and milk yield and flow, 353
Minerals
distribution in pressurized milks of different species, 69
in ewes' milk, effect of heating and storage, 457
in sows' milk, 55
increased intake by dairy cows in warm weather, 529
Mutans streptococci, immunization of cows, extraction of whey proteins, their effect on adherence and aggregation, 599

Ornithine decarboxylase, allelic frequencies of polymorphisms in Holstein bulls and protein yield, 341

Peptidases, in Emmental juice, 119
Plasmin and plasminogen, differential quantitiation by ELISA, 643
Plasminogen activator, forms in fractions of buffalo milk, 521
Polymorphonuclear leucocytes, in milk, relation to somatic cell counts and proteolytic activity, 365
Propionibacterium freudenreichii
and autolysis in Swiss cheeses, 609
subsp. *shermanii*, citrate metabolism, NMR study, 503
Proteinase, extracellular, from *Pseudomonas fluorescens* 22F, inactivation, 261, 347
***Pseudomonas fluorescens* 22F**, extracellular proteinase
mechanism and kinetics of inactivation, 261
protein content and inactivation, 347

Renneting reaction, kinetics followed by turbidity measurements, 545
Retinol, isomerization in milk and dairy products during processing, 253
Sole disorders, in organic dairy herds, effect of housing, 175
Somatic cell counts
and decreased milking frequency, 365
in bovine milk, relationship with growth factors, 93
and electrical conductivity in subclinical mastitis, 187
Staphylococcus aureus, growth and enterotoxin production in raw goats' milk cheeses, 273
Sterols, formation during manufacture of milk formulas and cereals, 591
Streptococcus mutans*/*Strep. sobrinus, immunization of cows, extraction of whey proteins, effects on adherence and aggregation of mutans streptococci, 599
Suckling, pressure in calf mouth and teat cistern, 685
Sugars, in dairy products, measured by flow analysis system, 675

Udder
health with different liners, 353
partitioning of milk and once daily milking, 1

Whey proteins
from immunized cows, effect on mutans streptococci, 599
interaction with casein micelles in acid skim milk gels, 555
β-lactoglobulin forms in cows' milk, 243
protein products formed during heat treatment, 79

Yogurt, antitumour activity: possible immune mechanisms, 129
